

# Did you know that Grab is Southeast Asia's largest homegrown technology company?

We have the largest tech team in the region, to match the scale of the problems we want to solve for Southeast Asia.

Our philosophy is to develop our product in the countries where our consumers live, while tapping into the best specialised tech talent around the world. That's why we've build a network of 7 R&D centres across the globe. Check it out:

## Grab's R&D centres at a glance

## Fun facts

### Rocket growth

We doubled the size of tech team to just under 2000 in 12 months!

### No one knows SEA like we do

We've accumulated over 4 Petabytes of data - to put that in context, that is equivalent to 2 trillion pages of standard printed text, or 53 years of HD-TV video. We drive every road that matters in SEA, multiple times a day

### Mapping Southeast Asia

Our mapping team reviewed almost 1,000,000 km of roads in Southeast Asia in 12 months
